

Systems-based Visualization Tools for Integrated Watershed Management Operating Instructions

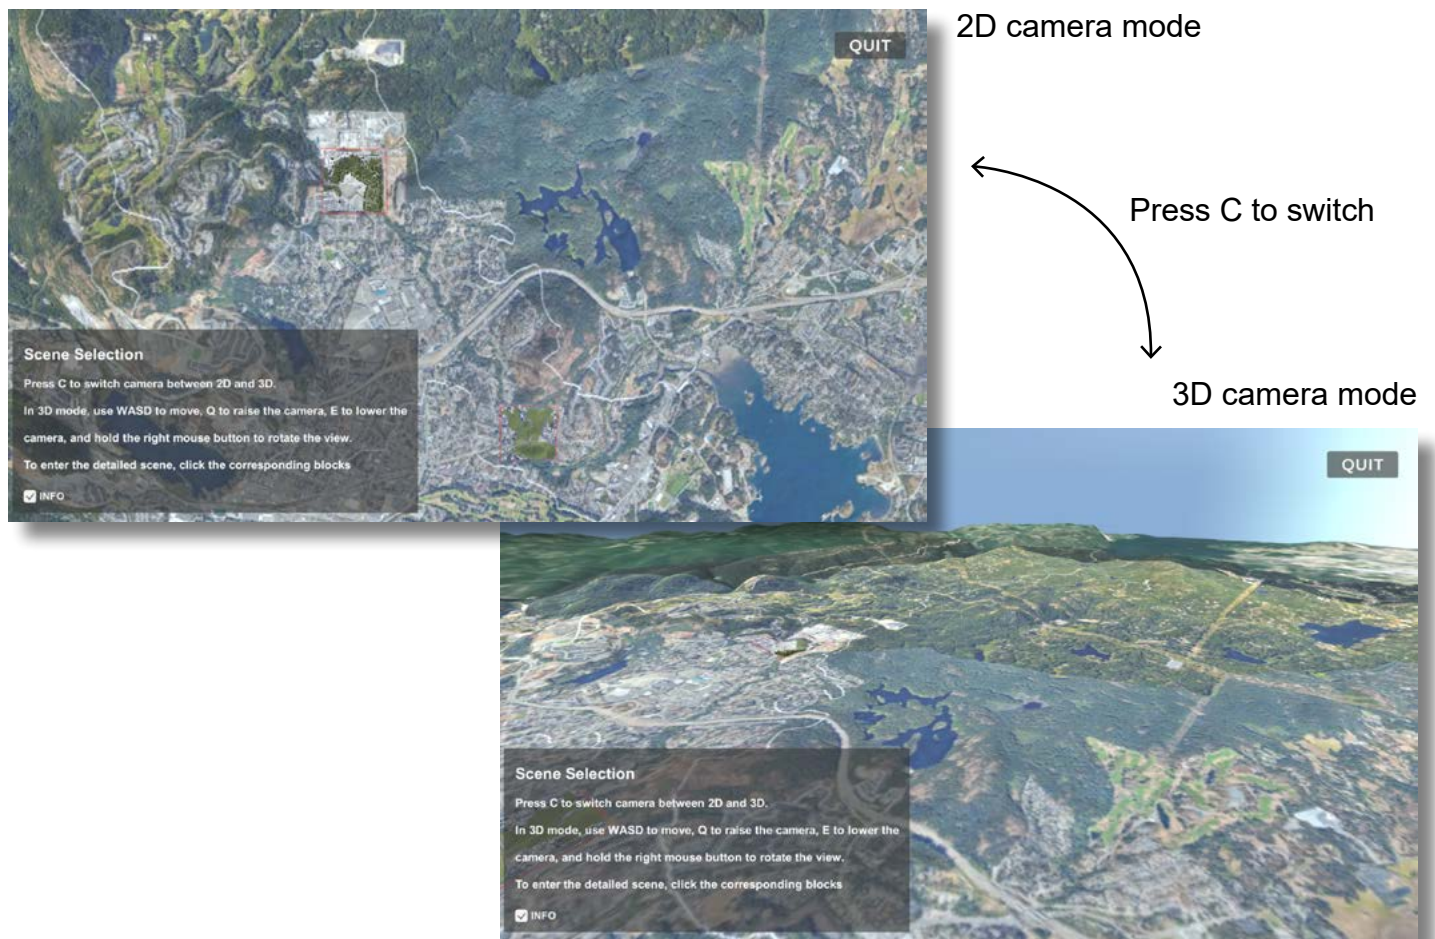

Welcome to the Millstream Creek Watershed Project. Here, you will explore and learn about the current state, challenges, and possibilities of Millstream through an interactive experience, contributing to the integrated management of the watershed.

STEP 1 - Scene Selection

Press **C** to switch between 2D and 3D camera modes.

In 3D mode, use **WASD** to move, **right click-hold** to rotate, **Q** to raise the camera, and **E** to lower the camera to explore the entire area.

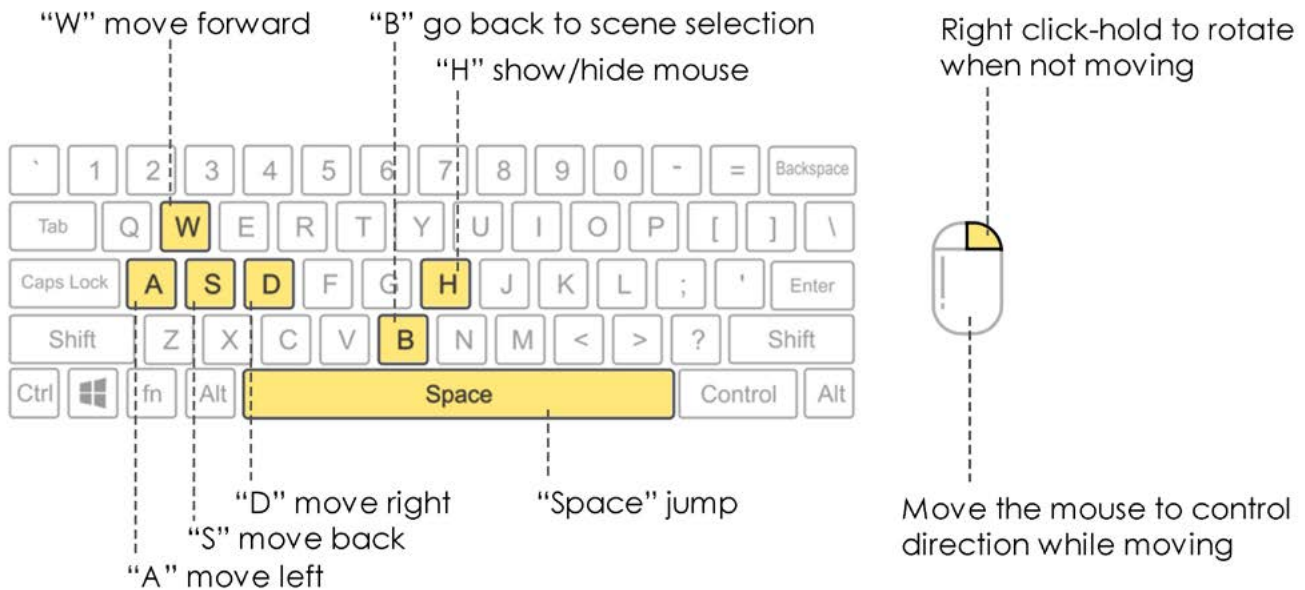

Click on the red box on the map to select the scene you want to enter.

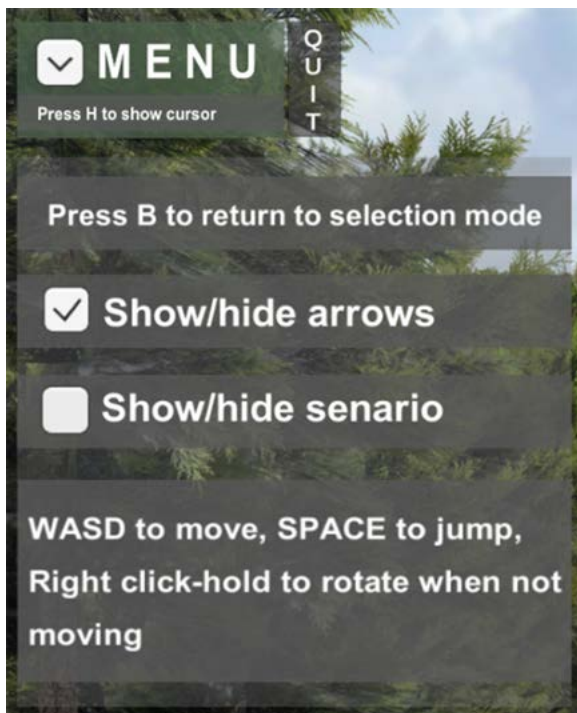

STEP 2 - In the scene

After entering the Scene, follow the arrows “  ” to explore.

Basic First-person Controls

OR you can follow the menu in the top left corner of the screen to proceed

Make the most of this visualization tool!
